

GET (3519TT) signed US\$ 858 million polysilicon agreements with DC Chemical

Thank you for your attentions to Green Energy Technology (GET, 3519 TT). Please be informed that Green Energy has signed agreement with Korean polysilicon supplier DC Chemical.

The agreement will cover supply of US\$ 858 million worth of polysilicon from DC Chemical to Green Energy from 2009 to 2016.

Kindly be informed Green Energy is planning to build even more solid long term relations with global suppliers and customers. We believe this kind of long term cooperation enables top tier solar wafer maker like us to focus both on profitability and development on new technology to fulfill future worldwide demand for clean energy with lower cost.

Please also be informed we are now installing thin film equipments as scheduled planning to go into new G8.5 thin film business at end of 2008. The new line with annual capacity 30MW will be Green Energy's start up to develop next business line in solar industry.
