

Thank you for your attentions to Green Energy Technology (GET, 3519 TT). Please be informed Green Energy has signed annual contracts worth of €39.86 million (around US\$ 58.77 million) to supply thin film solar module to Germany and Spain in 2009, as following:

1. GET will build 3-year partnership with one Germany constructor with annual order of €21.3 million starting from 2009.
2. GET will supply another Germany and Spain solar system makers with yearly order of over €9 million each in 2009.
3. The 3 customers are taking more than 50% of GET thin film capacity in 2009. The customers have carried decades of expertise in construction and global solar system.
4. GET signed the contracts in EU PVSEC held in Valencia, Spain with the above three solar system companies.

We have high confidence to start up our thin film business with expecting long-term partnership with more global customers.

Kindly be reminded GET is ramping G8.5 thin film production with Applied Material as turn key provider. Our plan for thin film is going as schedule to mass produce in December 2008, ramp to annual capacity 30 MW by February 2009, and 50MW by end of 2009.

Again, thank you for your support as always.
