

[GET demonstrates G8.5 thin film solar module in Taiwan PV Exhibition](#)

Please be informed GET demonstrates G8.5 thin film solar module in “2008 Taiwan International Photovoltaic Forum & Exhibition” holds in Oct. 7. Along with it Green Energy unfolds also see-through solar module samples.

The G8.5 thin film solar module GET shows is the first one from Taiwan solar makers at size of 2.2 m*2.6m. The final product is estimated to generate 343W per piece. GET demonstrates also 2 pieces of see-through module sample for future product mix.

GET is planning to have different product mix in the future with different sizes of amorphous-silicon and see-through solar modules. The various feedbacks from market and potential customers will help us to modify our strategy planning as early as possible to catch future markets. Our mass production is set to go in December, 2008 as scheduled.
