Please note that:

- 1) GET's long term contracts with customers are remaining the same quantity and pricing as contracted.
- 2) The MoM revenue decline is mainly because GET likes to make profits and keep supply chain solid still. GET works with suppliers to get low cost polysilicon and offer wafers to contracted customers at lower pricing.

GET has strong confidence in global solar market. GET is developing advanced wafer techniques and test running thin film line to well prepare for global business.
