

GET(3519) reported Sept. 2009 sales NT\$946.69 M
with monthly shipment YoY double and Announced new “Super Wafer”

Dear Investors and Analysts:

Please be informed Green Energy Technology (3519TT) announced its net sales for September 2009:

Sales were NT\$ 946.69 million, a MoM increase of 3.6% and YoY increase of 13.3%. Sales for January through September 2009 totaled NT\$6,073 million, a decrease of 9.7% compared to the same period in 2008.

Green Energy Sales Report:

(Unit: NT\$ thousand)

Net Sales	2009 (non-audited)	MoM	2008	YoY
Sept.	946,699	+3.6%	835,046	13.37%
Jan. through Sept.	6,073,145		6,726,537	-9.71%

The recent solar market demands strongly on high quality crystalline wafer, making GET receives orders more than 150% of current capacity and needs to expand further capacity to match market demand. GET plans to expand annual capacity of ingot growing to 360MW and wafer slicing to 300MW by end of 2009, and expand both ingot and slicing capacity in China to 50MW in 2010. The next stage expansion will further be schemed end of this year.

Please note the YoY increase is mainly from shipment this September double than that in September 2008, though current wafer ASP much less than ASP last Q3. The 16.2%~16.4% high efficiency wafer has reached 93% of GET current capacity and it's expected to further reach 95% by end of this month.

GET announces also new product “Super Wafer” which is expected to reach efficiency 17%. If the capacity expansion not able to fulfill customers' demands soon enough, GET plans also to have strategic partnership with other companies to increase capacity fulfilling ramping demands.

Thanks a lot.
