

GET (3519TT) announced capacity expansion plan to reach 500MW in Q2, 2010

Dear investors and analysts:

Please be informed Green Energy Technology (GET, 3519.TT) announced further expansion plan to reach 500MW in Q2, 2010, as following:

Annual capacity by end of Q2, 2010:

1. Ingot growing to 500MW.
2. Wafer slicing to 500MW. This will include
 - i. 450MW by GET in-house built, and
 - ii. 50MW by strategy cooperation. GET signed memorandum with MPI Corporation (6223TT) to secure wafer slicing capacity.

GET Annual Capacity Plan

GET Annual Capacity	Q4, 2009	Q1, 2010	Q2, 2010
Ingot growing	360MW	410MW	500MW
Wafer slicing	300MW	350MW	500MW

The expansion plan is to keep pace with strong demand since customers request 50% more than GET can supply now. GET is to be top-tier wafer supplier with strategies of expanding capacity along with top-tier customer demands, and advancing further manufacturing process and wafer efficiency to offer high-quality wafer with low cost.

Thank you for your attention to us.
