GET wafer capacity has been fully utilized for quarters, and the shipment in January 2010 has reached triple amount of that in January 2009. Since customer forecasted demands are increasing still, GET is expanding capacity to reach 410MW in 1st quarter and 500MW in 2nd quarter this year.

Along with building up in-house capacity, GET leases also capacity from companies with releasable lines to tune up outputs soon from these lines with GET proprietary technology. GET plans in this way to speed up capacity expansion while to reduce capex needed for expansion.

Among GET January shipment, High-Efficiency 16.2% ~ 16.4% wafers have reached 99% of output, and testing shipment for 17% Super Wafer are increasing. GET is developing also new generation high-tech wafer to catch global industry demands and to keep GET as the best brand name wafer supplier.
