

GET (3519TT) announced capacity expansion plan to reach 1GW in Q4, 2010

Dear investors and analysts:

Please be informed Green Energy Technology (GET, 3519.TT) announced further expansion plan to reach 1GW in Q4, 2010.

GET is now planning to increase capacity through in-house building and strategic partnership to reach annual capacity of:

1. ingot growing to 600MW by end of Q2, 2010.
2. ingot growing to 1GW by end of Q4, 2010
3. wafer slicing to 500MW by end of Q2, 2010. Further wafer slicing is under planning.

GET Annual Capacity Plan

GET Annual Capacity	Q4, 2009	Q1, 2010	Q2, 2010	Q4,2010
Ingot growing	360MW	410MW	600MW	1GW
Wafer slicing	300MW	350MW	500MW	Under planning

The expansion is to keep pace with tier-one customers' expansion request. GET is now advancing GET brand name targeting High Efficiency wafer more than 16.4% and Super Wafer more than 17%. GET expects to keep being top tier supplier with economic scale and high quality advantages.

Thank you for your attention.
