

GET(3519TT)

14 times oversubscribed for public subscriptions of GET(3519) new shares

Please be informed GET (3519TT) capital raising plan has attracted investor interest, with 14 times more shares in demand than are available to the public. By yesterday (4/16), GET has received 62,851 subscriptions for 4,500 thousand shares to be publicly sold.

GET is planning to issue 50,000 thousand new shares with price of NT\$ 31 per share to strengthen financial structure. Among the shares issued, 80% will be subscribed by existing shareholders (147.139291 shares per 1,000 shares), and 10% each by employees and public investors.

GET maintains very close partnership with supply chains and secures orders by providing high quality products, i.e. the averaged efficiency 17.2% multi wafer and 17.6% super wafer. GET has well managed its cash flow and reduced its inventory as well as enhancement of cost competitiveness to drive through low turn of solar markets.

Thanks for your attention.
