

Dear investors and analysts,

Thank you for your support to GET. Please find the below GET (3519TT) announcements on ASEC (GET module subsidiary) expansion plan and GET new products to announce in PV Taiwan 2013 next week.

1. ASEC expansion plan:

The board of Apollo Solar Energy (ASEC, GET's subsidiary) approved the expansion plan by leasing module equipments with installments

Total transaction price:

Around NT\$ 332 million

Purpose

For the long term development of ASEC (GET subsidiary), ASEC plans to expand module capacity by leasing equipments with divided installments.

The expansion plan will be evaluated and executed along with market demands. Total amount estimated to be NT\$ 332 million when the plan completed.

2. GET New products to announce in PV Taiwan 2013

1) GET HPM Wafer

Uniform grain, High Efficiency, Low dislocation rate, Low LID rate

Maximum efficiency= 19.0%,

Average efficiency = 18.4%

with Cell high-level quantum process

2) GET A4+ Multi-Crystal Wafer

To be mass produced

High Efficiency, High toughness, Low LID rate,

Maximum efficiency= 18.8%,

Average efficiency = 18.3%

with Cell high-level quantum process

3) Diamond Slicing wafer

Customized products

Low damage layer, High toughness, low TTV, Smooth Surface

Maximum efficiency= 18.4%,

Average efficiency = 17.9%

with Cell high-level quantum process

Thank you for your attention.
