

**GET(3519 TT) is awarded “Energy Management System-ISO 50001”
by BSI**

Dear investors and analysts:

We would like to inform you GET (3519TT) is awarded the Certificate of **“Energy Management System-ISO 50001”** (EnMS-ISO 50001:2011) by BSI Assurance UK Limited.

GET is advancing high efficient wafer with lower power cost, to maximize utilization of manufacturing resource. In Smart City Expo in February, 2014, GET joined the exposition leaded by Tatung Group, to conduct the energy management solutions in smart city and factory, demonstrating the efforts and forward-looking technology of Tatung Group and GET.

In 2013, GET has reduced manufacturing power usage by 12%, with close electricity monitoring system, output increase, and proprietary ingot growing technology. GET plans to cooperate with tier-1 partners further, to introduce smart factory and energy management solution into supply-chain, so as to reach further cost saving and increase market share of high-end wafer.

Thank you for your attention.
