With industry turning around in 2014, GET is focusing further on high-level crystalline solar business, and advancing wafer and production efficiency to increase market share and pursue profits. Based on “IAS 36-Impairment of assets,” GET booked the impairment of certain thin-film equipments in 4Q13 for no further operating values. The impairment amount was around NT\$ 219 million. Since there’s no cash flow involved, the impairment would not impact GET operations.

To reveal actual equipment durations and operating values based on “IAS 16-Property, Plant and Equipment,” GET plans also to extend depreciation periods for manufacturing equipments to 6~12 years (from 2~8 years), and for factory facilities to 14 years (from 8 years). The annual depreciation expense would be decreased by NT\$ 590 million.

GET annual general meeting of shareholders is scheduled to hold on June 27, 2014.
