

GET /Tatung Group and Motech Announced Strategy Cooperation

GET (3519)/Tatung Group(2371) and Motech Industries, Inc (6244) announced today (10/28) strategy cooperation in solar wafer business, with which GET will support to manage certain parts of wafer production of Motech.

GET is the top 3 multi-crystalline wafer maker globally. GET just announced in PV Taiwan 2014 its new Victoria series wafer “V3,” efficiency has reached 19% highest with PERC technology.

GET and Motech have long term partnership for years. GET high-level wafer is always the solid support to Motech high efficient cell, while Motech with its well-known brand name focusing on DG high-end market, matching perfectly with GET’s target to high-end market.

GET’s superior operating experience and procurement ability in wafer business are highly admired by Motech, which brings out this further cooperation between two companies. With the tier-one supply-chain partnership, GET and Motech expect to increase competitiveness in both cost management and technology development, so as to make Taiwan solar brand name equaling to the best product name in global solar market.
