

GET(3519TT) reported Nov. 2015 consolidated sales

Green Energy Technology (3519TT) announced its consolidated net sales for November of 2015:

Sales for November of 2015 were NT\$ 1,399 million, increased by 4% MoM and decreased by 4.2% from the same period of 2014.

Green Energy – Consolidated Sales Report:

(Unit: NT\$ thousand)

Net Sales (Unit: NT\$ thousand)	2015 (non-audited)	MoM (non-audited)	2014	YoY
November	1,399,476	4.0%	1,460,521	-4.2%
Jan. through Nov.	13,974,379		13,966,694	0.1%

GET capacity utilization in November kept over 95%, along with rising wafer price and high-end demands.

As solar demands from China, United States, and emerging markets growing, the UN Climate Change Conference (COP21) held in Paris delivers also positive support to clean energy. GET expects solar installation in 2016 would keep growing, while high-end wafer capacity could not be enough to fulfill global demands, which would push wafer price to increase in next quarter.

GET will advance manufacturing to raise output, and search further for potential outsourcing partners, to expand controllable wafer capacity globally, and to make long-term stable profits.
