Net Sales (Unit: NT\$ thousand)	2017 (non-audited)	MoM (non-audited)	2016	YoY

Jan. through Jul.	6,129,810		11,258,861	-46%

High end wafer price raised in July for high efficient wafer was in shortage. GET allocated shipments based on order margins, and served mainly long term and potential emerging-market customers.

Due to rising demands from emerging markets and trade barrier concerns as USITC initiated a proceeding under section 201 of the Trade Act of 1974 regarding imports of crystalline solar cells and modules, solar ASP in 3Q17 is expected to increase. GET will prioritize margins with high efficient technologies in both brick and diamond sliced wafer, to serve niche markets and to reach operating profits soon.
